

30th March 7pm -led by Jeremy Sabel CSF Air Quality Advisor Devon & Cornwall

With the government target to reduce the UK's ammonia emissions, farmers now need to consider how the Clean Air Strategy 2019 will affect them.

This workshop will cover;

- How is ammonia formed on farm
- What are the Mitigation options to reduce ammonia emissions
- Nutrient Management planning to reduce N losses
- CSF Delivery Mechanisms (in high priority catchments)

The workshop will be interactive and there will be lots of opportunities for questions and discussions.

If you would like to attend please RSVP by 28th March. Places will be limited to allow for an interactive approach.

Call on 07967683577 or email; louise.lethbridge@southdevonaonb.org.uk (Zoom login /link will follow booking)
